After the historical marker has been repaired by Donald Behney, I think it would be appropriate to hold an installation and dedication ceremony. Perhaps it will be possible for you and/or Donald Behney to attend that ceremony?

In addition to the three Carbondale historical markers that were installed in Carbondale by the PHMC, there was a Gravity Railroad historical marker that was installed by the PHMC on Route 6, at White's Crossing, near Carbondale. This Gravity Railroad marker disappeared some years ago. The pole is still standing; it appears to have been hit by a motor vehicle. Do your records contain any information on this historical marker? A Gravity Railroad historical marker, erected by the PHMC, is still standing on Route 6, near Honesdale, PA. I wonder if both signs were identical? Any information that you can provide about this Gravity Railroad historical marker that used to stand along Route 6, at White's Crossing, near Carbondale, would be greatly appreciated.

Sincerely yours,

S. Robert Powell

SRP call to Donald Behney, Historic Site Maintenance, 09-29-1982 at 12 P.M. George Beyer gave me Behney's name when I called Beyer on 09-24-1982 at 9:30 A.M. Behney's phone number is 783-9932. On 09-29-1982, I told Behney that the marker to be repaired is at The Homestead Golf Course, R. D. #1, Box 29, Carbondale, PA 18407. 717-282-5197. Behney said that the sign will be picked up sometime in October. I told Behney to call the Homestead a few days in advance so that someone will be sure to be there. Behney said the following about the work of the CRCCH: "It's very nice to know that some people appreciate the historical markers. It's very nice of you to have rescued and restored the damaged marker. We would have been glad to do it for you. We will be happy to restore the third marker that you have located."
